

# CAN/VSS Adapter Cable

*Get VSS advantages without VSS installation challenges with Stalker's CAN/VSS Adapter.*

- SUPPLIES THE POWER AND GROUND
- INSTANTLY STEERS PATROL SPEED
- AUTOMATIC MOVING/STATIONARY SWITCHING
- SHADOWING VIRTUALLY ELIMINATED
- PATROL SPEED COMBINING VIRTUALLY ELIMINATED
- WEATHER EFFECTS DRAMATICALLY REDUCED

*Skip VSS installation  
with Stalker's CAN/VSS  
Adapter.*

***Moving the radar from one vehicle to another is simple – JUST UNPLUG and PLUG.***

*Unlike connecting to the  
vehicle's VSS, which can  
be a challenge to locate,  
the OBD-II diagnostic  
connector is easy to find  
and takes only seconds  
to connect.*

Traditionally, the VSS signal has been generated mechanically inside the transmission assembly.

The CAN/VSS Adapter is used to generate a Vehicle Speed Sensor (VSS) signal in late-model vehicles. The CAN/VSS Adapter queries the vehicle speed from the vehicle's computer through the OBD-II diagnostic connector and generates VSS pulses for the radar.

This device works with all 2008 and later vehicles and some vehicles manufactured as early as 2005. Stalker maintains a list of compatible CAN Bus vehicles.

When your department upgrades vehicles, transferring the radar to the new vehicle is as simple as UNPLUG and PLUG using the OBD-II diagnostic connector (always located under the driver's side dash).

Power and ground are also supplied through the CAN/VSS Adapter. And you'll have all of the advantages of traditional VSS, plus:

- Low speed combining effects virtually eliminated.
- When stationary, Moving mode "false" patrol speed is eliminated.
- Instantly acquires and tracks patrol speeds from 1-200 mph while switching in and out of hold.

Stalker DUAL, DSR,  
and 2X radar.  
155-2283-50

With Serial Port for  
Stalker DUAL, DSR,  
and 2X radar.  
155-2283-51

Stalker II MDR.  
155-2286-50

With Serial Port for  
Stalker II MDR.  
155-2286-51
