## Carrying Cases

### Deluxe Stalker Hard Case \$ 89.50

This exceptional case is designed to fit the Stalker Sport, Pro, & ATS radar guns. The ester foam is die cut, and includes pull out plugs with room for 2 handles. Keys to lock the case are included.

### Stalker Soft Case \$ 89.50

This quality padded case is custom made for the Stalker radar guns with detachable handles. It includes pockets for accessories, and is perfect for

traveling professionals who value light weight and compact storage.

### Corrugated Case for Stalker Guns \$ 20.00

## Detachable Handles

These handles are for use with the Stalker Sport, Pro, and ATS guns.

### Ni-Cad Battery Handle \$ 75.00

Has six nickel cadmium cells built into the handle, providing 1.3 Amp hours of power. Since Ni-Cad batteries should be completely drained before charging, a spare battery handle is highly recommended.

### New Double Capacity Ni-MH Battery Handle \$ 125.00

The new 2X capacity Nickel Metal Hydride battery handle provides 2.7 Amp Hours of power. These high capacity battery handles will run Stalker radar guns 50-100% longer than Ni-Cad handles, and they do not require a complete discharge prior to charging.

### Corded 12 VDC Handle \$ 95.00

Features a cigar lighter plug that

inserts into an automotive lighter socket, or into a portable battery pack.

### Display Handle \$ 195.00

This handle works in conjunction with a display board. A communication cable connects to the port on the bottom of this handle. Power is shared from the display board to the radar gun, and the communication link is routed through the same connection. A detachable 12 VDC cigar power cord is also included, so the gun has the ability to be operated via a lighter socket when it's not connected to a display board.

### Corded Interface Handle \$ 195.00

This handle has a communications port like the display handle, however the gun must be powered separately via the separately attached 12 VDC cigar power cord. Only communication is routed through the port. This handle is used when long cable runs are desired.

### Power Adaptor Module \$ 195.00

This item functions like the corded interface handle. A clip slides onto the bottom of the gun where a handle would normally attach. The separate box provides ports for driving two separate display boards from one radar gun.

## Display System Case

### 2x7 Display System Case \$ 195.00

This high quality case has been designed to fit an entire 2x7 display system. There is a place to store the gun, display board, handle, tuning fork, brackets, cables and even the tripod. It's compact enough to carry with one hand, yet strong enough to protect the equipment from the roughest conditions. If you are purchasing a 2x7 display

system, this is the best investment you can make.

## Display Board Cables

### 20' Communication Cable \$ 39.00

Channels power and data between the radar gun and a display board.

### 35' Communication Cable \$ 49.00

You can upgrade a new system to include this cable length for an additional \$10.00.

### 200' Communication Cable \$ 129.00

### 100' Extension Cable \$ 79.00

Must be used with a communication cable.

## Smart Charging System

### Complete Charging System \$ 120.00

### Intelligent Platform \$ 95.00

### Replacement Transformers \$ 25.00

The Stalker Smart Charging System consists of the Intelligent Platform and an AC transformer. The

charger works the same with both Ni-Cad and Double Capacity Ni-MH battery handles.

## Calibration Verification

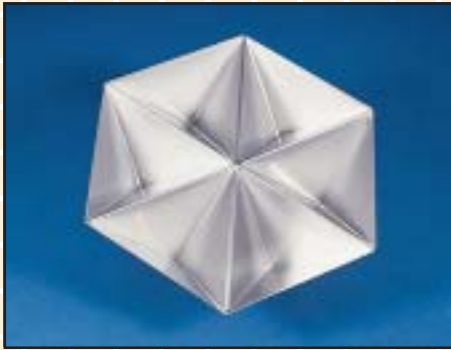

### Tuning Forks \$ 15.00

A tuning fork is designed to verify the calibration and operation of a radar gun. Available for K, and Ka band radar guns.

# Accessories

## The Super Reflector

The Super Reflector is an 18 panel, welded aluminum dish, designed to reflect and return the radar signal directly back to the radar gun. To a radar gun, any vehicle with the reflector looks like a truck!

### Increases Clocking Distances

This reflector can be used with any radar gun to dramatically improve clocking distances on difficult targets. Just strap it around a rider like a belt, or bolt it onto the vehicle.

### Improves STATS Recordings

The reflector dramatically increases signal strength of a radar reading, substantially improving the smoothness of the recording and enhancing the overall accuracy.

This close-up view of a recording shows the data from a personal watercraft run.

This recording is from the same watercraft, but recorded using a Super Reflector.

### The Super Reflector \$ 99.00

1/4" Threads are Machined Into the Mounting Plate

A Sturdy Nylon Belt with Latch Buckles is Included

8.75"H x 10"W x 2.125"D  
8 Ounces

## Mounting Accessories

### Post Mounting Bracket \$ 29.50

This anodized all aluminum bracket clamps onto the Fastball's 1 3/4 inch tubing. The Stalker hinged mounting cradle attaches directly to this bracket.

### Standard Tripod \$ 39.50

This affordable tripod has a quick release shoe that can attach to a Stalker mounting. The entire gun, cradle, and shoe can be released with the flip of a thumb latch. (Max. extended height 4'9")

### Heavy Duty Tripod \$ 89.50

A large, rugged, fluid head tripod with a quick release shoe. (Max. extended height 5'10")

### Tripod Mounting Cradle \$ 95.00

This hinged cradle attaches to any standard camera tripod or onto a 1/4 inch threaded bolt. The gun slides in, and the clamp on the side locks the gun securely in place. It's made of extruded aluminum, and is fully padded so it will not scratch the radar gun. For use with Stalker Sport, Pro, & ATS models.

### Automobile Dash Bracket \$ 155.00

This allows the guns to be mounted on top of a dashboard, and is held in place by suction cups. The cradle is rubber mounted to dampen any vibrations. For use with Stalker Sport, Pro, & ATS models.

## Portable Battery Packs

All of the portable battery packs have a padded cordura casing, a fused lighter socket outlet, and include an AC battery charger.

### Compact 3 Ah Battery \$ 59.50

### Long Running 7 Ah Battery \$ 69.50

### Heavy Duty 15 Ah Battery \$ 99.50

Battery	Transmit Time
3 Amp Hour	5 Hours
7 Amp Hour	11 Hours
15 Amp Hour	22 Hours

## AC Power Supplies

### 1 Amp AC/DC Adapter \$ 19.50

This adapter plugs into a wall outlet, and can power any radar gun that has a 12 VDC cigar cord.

### 4 Amp Regulated AC/DC Supply \$ 49.50

Provides a 12 VDC lighter outlet via an AC outlet. Regulates the current, preventing power surges from damaging the radar. This supply can power a display board and radar gun simultaneously.

### 220 Volt AC Adaptor \$ 15.00

Allows any 110 volt (US outlet) device to operate off a European 220 volt outlet.
