

**ONE-PIECE / HANDHELD  
CONVERTIBLE  
POLICE RADAR**

# STALKER

## ATR

Now With  
**FASTER**  
Speed Tracking

## FEATURES

- Industry Leading Performance
- Intelligent Faster Speed Tracking
- Advanced Ka Band Microwave
- 3 Window Backlit LCD Display
- Read-Thru Lock
- Narrow Beam Width
- Detachable Handle Design
- Software Upgradeable

**The Industry's Highest Performance  
One-Piece Police Radar**

## Removable Handles

The Stalker ATR features a removable handle design that allows you to use a battery handle, a corded handle, or no handle!

## The Original, Modular One Piece Police Radar

### Cordless Handheld Radar

The Ni-Cad and NiMH battery handles can operate the radar for many hours - giving you the freedom to operate anywhere you wish.

### Corded Handheld Radar

The corded handle allows for dash mounted installations with the versatility of a handheld.

### Dash Mounted One Piece

The power adaptor module enables a compact dash mounted installation without having a protruding handle.

### Remotely Mounted Radar

The Stalker ATR can even be remote mounted and operated using the remote control and an auxiliary remote display.

# STALKER ATR

### Advanced Technology

The Stalker ATR (Advanced Technology Radar) is the highest performance one-piece police traffic radar available. The Stalker ATR can be configured using a variety of handles and adaptors that lets you operate it as a one-piece dash mounted radar or a handheld radar gun. It is available in Moving / Stationary and Stationary-only models.

### Quick Lock and Release Detachable Handle Design

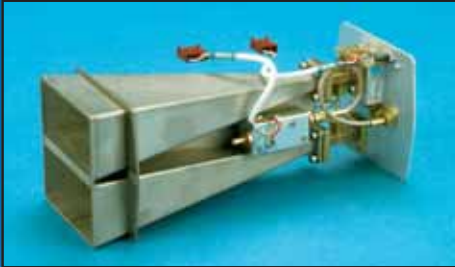

The detachable handle system allows the operator to swap battery handles in seconds.

## Amazing Performance

By utilizing a sophisticated Ka-Band microwave system, advanced digital signal processing, and state-of-the-art design, the Stalker ATR can track vehicles at greater distances and consistency than competitive radar systems.

## 9° Beamwidth Ka Band Microwave System

The industry's only twin-horn microwave system features a "tall and narrow" beam pattern. This unusual (and highly desirable) pattern combines the benefits of a very narrow beam width for focusing the radar on specific traffic areas, yet the radar has an excellent view of the ground which helps it maintain accurate patrol speed tracking.

## Digital Signal Processing

The Stalker ATR pioneered the use of the Digital Signal Processor (DSP). The radar uses a very sophisticated target identification process to pick out weak signals that other radar systems would miss entirely.

## 3-Window Display with FASTER Speed Tracking

The backlit LCD display features display windows for Strongest Target, Faster Target, and Patrol Speed (moving models). By displaying both the strongest and faster targets simultaneously, the Stalker ATR can monitor faster vehicles passing larger vehicles and display the speed of both targets simultaneously.

Shown Actual Size

## The Industry's Favorite One-Piece Radar

Choose the Stalker ATR and discover why the law enforcement community has made the Stalker ATR the number-one high-performance one-piece police radar.

## Optional Remote Display

An Auxiliary Remote Display shows all of the same information seen on the main display.

## Optional Remote Control

Main operator functions can be controlled via a remote control. The remote can be used with the power adaptor module or a corded handle with connector.

## Vibration Dampening Dash Mount

The rugged dash bracket features a vibration dampening mounting cradle.
